

Functional Analysis 2 (Operator Theory)

Spring 2022

Alexei Yu. Pirkovskii

Grading rules

- The final grade is calculated by the formula

$$\text{final grade} = 0.7 \times (\text{cumulative grade}) + 0.3 \times (\text{exam grade}).$$

- The cumulative grade is calculated by the formula

$$\text{cumulative grade} = 0.5 \times (\text{midterm grade}) + 0.5 \times (\text{exercise sheets grade}).$$

- The oral exam will be at the end of May and will include only the material of the 4th module.
- The midterm exam (also oral) will be in the 2nd half of March and will include only the material of the 3rd module.
- To get the maximum grade for the exercise sheets, you should solve 75% of all the exercises. If you solve more, you will earn bonus points.
- You can also earn bonus points for working actively at the exercise classes and for solving “bonus exercises” (marked as “**B**” in the sheets).
